## MACKENZIE RECOGNIZES NEW ASSOCIATES

**Portland, Oregon** – Mackenzie Managing Principal Rich Mitchell is pleased to announce the recognition of Caitlin Cranley, Suzannah Stanley, Bailey Smoke, Lindsey Carpenter, and Pete Phan as associates. “Each of these new associates represents a different department, and it shows that Mackenzie would not be who we are today without the culmination of our integrated design teams working together,” Mitchell said. “They have all individually contributed to Mackenzie’s success in one form or another, and we are extremely appreciative of their dedication, strong work ethic, and expertise in their respective fields.”

Cranley is a project manager on Mackenzie’s public design team in the Architecture Department, with 15 years of design experience. Her project portfolio is expansive—from renovations, to full ground-up designs—and features several public safety and emergency response facilities, including the Albany Police Station, West Linn Police Station, Monmouth Police Station, and Harrisburg Fire Station. “I’ve been provided so many wonderful opportunities to learn and grow at Mackenzie, and I love working with our public clients,” Cranley said. “I look forward to what the future holds.” Cranley also is engaged with Mackenzie’s fun committee and architectural discipline committee, and is a member of the firm’s Autodesk Revit leadership team. She carries a Bachelor of Architecture degree from the University of Oregon.

Stanley, a project manager in Mackenzie’s Land Use Planning Department, carries nearly a decade of planning experience, and has helped Mackenzie clients secure entitlements for a range of industrial, educational, and mixed-use developments. Her diverse project portfolio includes renowned projects from around the region, such as the Majestic Brookwood Business Park, PDX Logistics Center, The 100 Park Square, Stagecraft, and various Fred Meyer remodels throughout Oregon and Washington. “I love my work at Mackenzie, and am honored to be recognized and be able to continue to grow my career here,” said Stanley. “I look forward to more opportunities to learn and teach with my excellent coworkers!” Stanley has been on the winter party and summer picnic planning committees every year since she joined Mackenzie, and is involved in other firm volunteer groups such as the sustainability committee and the Leadership Development Group. Stanley has master’s degrees in community and regional planning (MCRP) and public administration (MPA) from the University of Oregon.

Smoke is an engineer-in-training in the firm’s Civil Engineering Department. When she joined Mackenzie in 2013, Smoke assisted in the civil design for Stadium Fred Meyer—a 110,000 SF store renovation across from Providence Park on West Burnside Street. She has since been involved with a variety of projects that support and strengthen their surrounding community, including the West Linn Police Station, Bainbridge Island Fire Station 21, and PDX Logistics Center—an award-winning large-scale, regional distribution facility. “My grandfather used to always tell me to never let the grass grow under my feet, and Mackenzie has been the perfect place to develop, both personally and professionally,” said Smoke. “I look forward to continuing my career here and learning all that I can from the remarkable group of people I am surrounded by daily.” She volunteers with several in-office committees, including the fun committee and the sustainability committee, and regularly participates in volunteer opportunities outside of the office, such as Rebuilding Together, the Oregon Food Bank, Children’s Book Bank, and Northwest Children’s Outreach. Smoke has a Bachelor of Science in civil engineering from Oregon State University, and carries LEED Green Associate credentials.

# MACKENZIE.

DESIGN DRIVEN | CLIENT FOCUSED

Carpenter is a job captain in Mackenzie's Interiors Department, and has been with the firm since 2012. She services several portfolio clients including Shorenstein Realty Services, PacTrust, Felton Properties, and North Pacific Management. With her design capabilities spanning multiple project types, she is a reliable resource to many of Mackenzie's business units, including workplace, industrial, education, and public buildings. Lindsey has contributed to several large-scale projects in the region, including the Dundee Fire Station, St. Pius X Education Center, and Subaru of America distribution center at the Gresham Vista Business Park. "I am proud to be a part of a dynamic and passionate team," said Carpenter. "I take pride in being a mentor to young designers and appreciate the opportunities that we offer for continual growth. I am grateful for this recognition from Mackenzie." Carpenter is heavily involved in several volunteer groups within the firm, such as the Leadership Development Group, event planning committees, and MackUniversity. She carries a Bachelor of Arts degree in interior design from Washington State University.

Phan is a senior programmer at Mackenzie, and joined the firm in 2008. He was heavily involved in the firm's rebranding and restructuring, from Group Mackenzie to Mackenzie, in 2013, and assisted in the development of the firm's newly-designed website. Phan recently developed code and language for Mackenzie's new intranet site, known as ALPINE—an acronym representing Mackenzie's services offered: architecture, landscape architecture, planning, interiors, and engineering. He now manages all updates to ALPINE, the firm's external website, and the firm's project-based data management system. "Mackenzie has been a great place to be for the past nine years," said Phan. "Each day provides new and unique challenges which are opportunities for expanding my skills. I'm grateful for the recognition as an associate, and even more grateful for the opportunity to continue to grow." Phan has a Bachelor of Science degree in mathematics and computer science from the University of Oregon.

## About Mackenzie

Mackenzie is a provider of professional design services comprised of professionals in architecture and interior design; structural, civil and traffic engineering; land use and transportation planning; and landscape architecture. Anchored in the foundational elements of high performance and client focus, Mackenzie brings a deep expertise in commercial office, healthcare, community infrastructure, education, institutional, federal, high tech, public building, industrial, retail, community planning, economic development, and mixed use projects.
